

CPT Codes and our Fee Schedule

Strehlow Radiology Consulting will provide a primary radiographic interpretation and bill the primary interpretation or professional component of the total x-ray fee using a -26 modifier on the end of the appropriate CPT code. The referring physician performs and bills the production or technical component of the total x-ray fee using a -27 modifier on the end of the same CPT code. This splits the total x-ray fee. If the referring physician requests a SECOND OPINION, we will bill using appropriate CPT codes.

FULL SPINE
